

NOVA STEAMSTEEN'S SPARKLY STARRY SLIME

INGREDIENTS:

- 1 (4-ounce) bottle of washable clear school glue
- 1/2 teaspoon baking soda
- 1 to 2 tablespoons saline solution (i.e., contact lens solution)
- Glitter
- Liquid food coloring (optional)

EQUIPMENT:

- Measuring spoons
- Glass or plastic mixing bowl
- Mixing spoon
- Airtight container for storage

INSTRUCTIONS:

1. Pour the glue into a mixing bowl. If you want colored slime, stir in the food coloring.
2. Mix in the glitter! It shines like the stars!
3. Add the baking soda and keep on stirring until it's smooth.
4. Pour in 2 tablespoons of the contact lens solution and stir slowly. The mixture should begin to harden, becoming stringy. Continue mixing until a big glob of slime forms.
5. Pick up the slime glob and mix it with your hands until it's all nice and smooth. If it's a little too slimy, add in a little bit more of the contact lens solution.
6. Play with your slime!
7. Seal it in an airtight container when you're done!
